Variety trials.

Variety trials carried out by independent bodies offer good comparability.

Special varieties are recommended for the eastern German region. Results of trials can help farmers to choose the best varieties with regard to regional conditions and individual requirements such as yield, health, crop components and plant height, thereby taking advantage of current developments in cultivation methods.

Bauernzeitung Online.

Website

In addition to classic banners in various formats, we offer the possibility of booking editorial advertising formats on the Bauernzeitung website: online advertorials are based on customer texts and images, which on request will be revised and SEO-optimized by us.

Stand-Alone-Newsletter

For advertisers who want to attract the undivided attention of our newsletter subscribers, we recommend the stand-alone format, which, similar to the online advertorial, is individually designed from customer texts and images.

Social Media.

Facebook and Instagram

Social ads on Facebook and Instagram pages of the Bauernzeitung enable users to be targeted based on geo-, socio-demographic and psychographic characteristics.

A large number of different advertising formats are available with social ads by which advertising messages in the name of the Bauernzeitung are spread among the users of the social networks in a performance-oriented, scalable and measurable manner.

Targeting

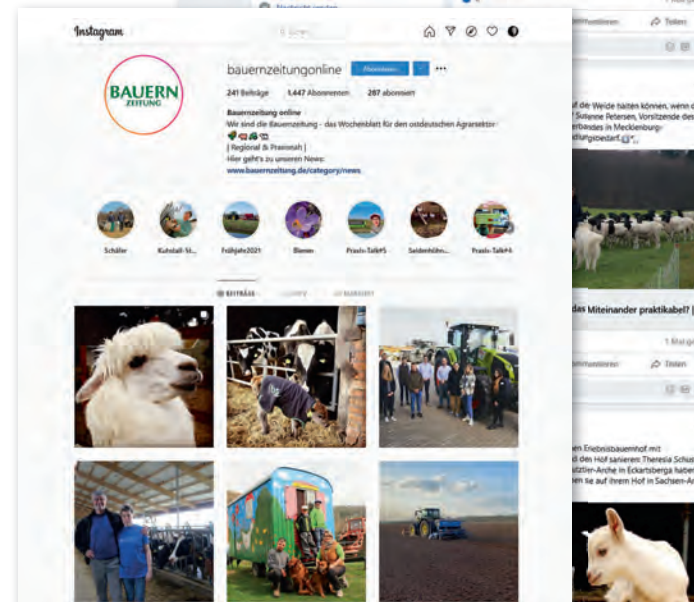

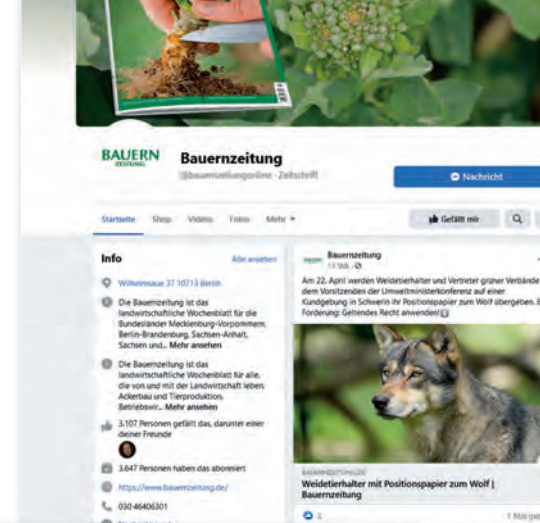

The positioning of the social ads is based on online data from the Bauernzeitung, which can be collected through the Facebook or Instagram pages as well as through a pixel integration on our website.

The social ads campaigns can be tailored to individual requirements and thus optimized for KPIs such as TKP/CPM, CPC or CPL depending on the campaign goal.

Depending on the objectives of the campaign, we develop with the customers the optimal advertising format such as single image or carousel ad, video or lead ad.
